

After launching the instances run the following command to install Apache on Linux:

For the first instance :

- 1 yum update -y
- 2 yum install httpd -y
- 3 systemctl enable httpd
- 4 systemctl start httpd
- 5 httpd -v
- 6 echo "<h2>Hello from DemoALB-A</h2>"> /var/www/html/index.html

For the second instance:

- yum update -y
- 2 yum install httpd -y
- 3 systemctl enable httpd
- 4 systemctl start httpd
- 5 curl ifconfig.me
- 6 echo "<h2>Hello from DemoALB-B</h2>"> /var/www/html/index.html
